JOINT WOOD FRAME

THE ESSENCE OF THE JOINTED WOOD FRAME STRUCTURE IS THAT THE OUTER AND INNER CASEMENTS ARE CONNECTED TO A WOOD FRAME BY THE HELP OF FITTINGS.

IN ANCIENT TIMES, WHEN THERE WAS NOT YET A GOOD HEAT AND SOUND INSULATION VALUE, PEOPLE COULD NOT SOLVE THE AIR AND SOUNDPROOFING. FOR TODAY THIS TREND HAS REMAINED AND IT IS PROSPERING AGAIN.

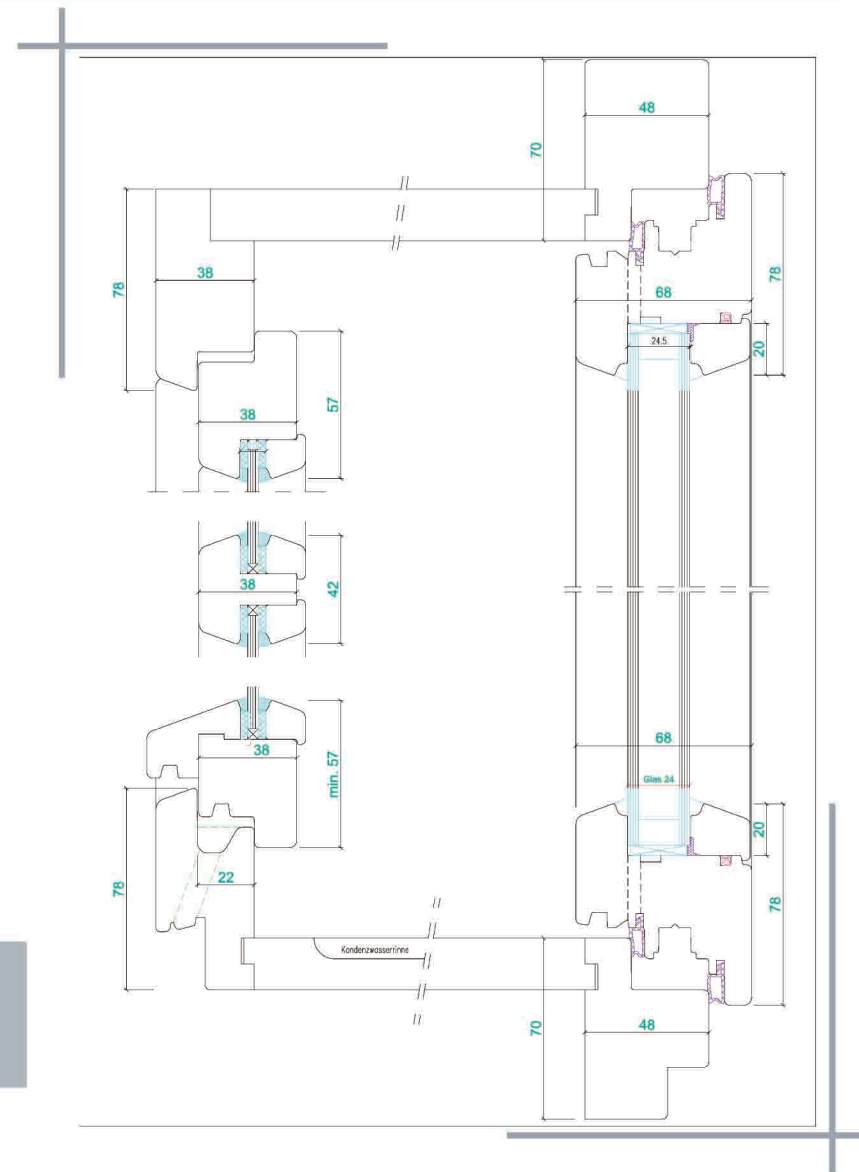

A LOT OF BUILDING WERE BUILT IN LARGE CITIES AND IN THE CAPITAL, WHERE - ACCORDING TO THE STRICT REGULATIONS OF THE MONUMENT PROTECTION - ONLY A SIMILAR TYPE OF STRUCTURE CAN BE BUILT IN CONNECTION WITH ANY WINDOW CHANGING.

JOINT WOOD FRAME OPTIONS

- ◆ CUSTOMIZED INSIDE OPENINGS
- ◆ UNIQUE NARROW MUNTINS
- ◆ ARCHED EXTERNAL CASEMENT DESIGN
- ◆ STANDARD INTERNAL CASEMENT WITHOUT ARCH
- ◆ RUSTIC PROFILE

THE FENESTRATION CAN BE THE GEM OF THE HOUSE.
IT CAN EASILY BECOME ONE OR ADAPT TO ORNATE FRONTAGES.

**IT GOES BEYOND
BOUNDARIES**

WE CAN MOVE GIGANTIC, PARALLEL SLIDING GLASSES SO WE CAN GO BEYOND BOUNDARIES, AND OUR HOME BECOMES ONE WITH NATURE. THERE WILL BE NO BORDER BETWEEN OUR HOUSE AND THE ENVIRONMENT. THE LIFT AND SLIDE PRODUCT LINE OFFER A SPECIAL EXPERIENCE AND IT CAN BE SELECTED FROM BIG 92 MM WOOD PROFILES.

**IT OPENS UP A NEW
PERSPECTIVE TO THE WORLD!**

WITH THE UNIQUE BENEFITS OF THIS PRODUCT LINE, WE CAN EASILY MOVE UP TO 400 KG OF GLASS USING FOUR TRUCKS THAT WORK IN TANDEM.

THE BENEFITS OF LIFT AND SLIDE SYSTEMS

- ◆ MAXIMUM OPENING WIDTH
- ◆ UNIQUE SURFACE FINISHINGS
- ◆ MULTIPLE SEALS
- ◆ QUIET OPERATION
- ◆ INSTALLATION WITH ROBOTICS
- ◆ SLIDING MOSQUITO SCREEN CAN BE INTEGRATED

TIP:
IT IS IMPORTANT TO KNOW HOW TO SHADE SUCH LARGE GLASSES SO THE LOCATION AND THE POSITION OF THE RAFFSTORE BOXES NEED TO BE PLANNED. THANKS TO THE COOPERATION OF SCHLOTTERER AND JANKÓ LTD., WE CAN ALSO OFFER YOU A PROFESSIONAL SOLUTION WITH THE BEST TECHNICAL CONTENT, ACCORDING TO YOUR PERSONAL NEEDS!

TECHNICAL INFORMATION

THE CASEMENTS HAVE THREE TIGHT SEALS FOR PROPER CLOSURE. THE GLAZING IS CHARACTERIZED BY A HIGH THERMAL INSULATION VALUE, WHICH FACTOR CAN REACH UP TO 0,5W/2K. THE GLAZING CAN BE TEMPERED SAFETY OR SOLAR UPON REQUEST.

The external window blinds are the most effective and power saving way to the buildings to prevent overheating.

However, the blinds, louvres and others can do more: while it operates as a passive cooling system in the summer, they enhance the insulation properties of the fenestration and let through the precious anti-dazzle sunshine to the interior space throughout the year.

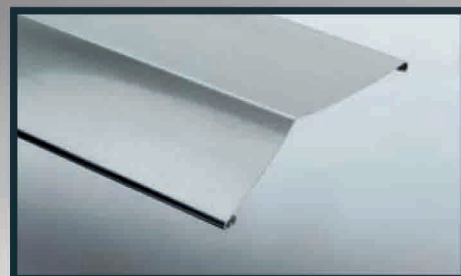

The intelligent shading systems are essential elements of our current housing, and it cannot be missed from the negotiations about climate protection and energy conservation.

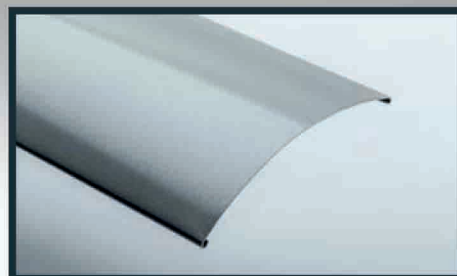

What kind of louvre should I choose, what might be right for me?

- ◆ An intelligent shading system that operates as a passive cooling system in summer and they enhance the insulation properties of the fenestration in winter.
- ◆ A system, which can bring in guided, anti-dazzle light to the island of our dreams, thus it increases our comfort and performance.
- ◆ Louvres that can be driven by a wall mounted switch or radio control and they satisfy every need.
- ◆ Optical features, which can be characteristics of our house, for example, completely hidden louvre boxes, or even matching coloured hang strips, louvres and aluminium armour on the window.
- ◆ Louvre blade version, which fits for its purpose and intended function whether it is classified based on its width: 80 mm or 92 mm; based on its form: "C" louvre blade; broken "Z" louvre blade 92 V, or our asymmetrically broken premium system, the retrolux 80 D louvre blade.
- ◆ Such a superstructure, where the visible or plasterable edges can be selected, or the systems can be combined with pushing-, sliding- and fix mosquito and insect nets.
- ◆ Against the first pollens of the spring, we recommend the 4PLUS pollen filtered mosquito nets, which let more light and air in than the others, gives better pollen filtering and better transparency.

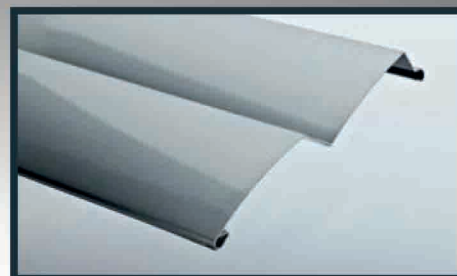

COLOURS FOR EVERY STYLE

RETRO LUX 80 D

80 R

92 V

Retrolux 80 d louvre blade

- Colourless (similar to RAL 9006)
